EDUCATION

[Faculty of Information and Communication Technologies](#)

Computer Sciences and Communication Engineering

North Macedonia - Bitola

Oct 2023 – Present (Expected 2027)

[Kristianstad University \(HKR\)](#)

Exchange Year – Computer Science

Sweden - Kristianstad

Sep 2025 – Present

PROFESSIONAL WORK EXPERIENCE

Software Engineer Intern | [Cythero](#)

Jul 2023 - Oct 2024

- Built core systems for a [VR Sandblasting training simulator](#), including **rust removal**, **grading logic to assess trainee accuracy**, and **interactive 3D models** and **training lessons** aligned with **industry standards**.
- Utilized **Unity DOTS** and **compute shaders** to create performance-critical systems, achieving over **20x performance boost** compared to similar technologies.

PROJECTS

Bug-Tracker (Full-Stack) | Personal Project | [Backend](#) | [Frontend](#)

- Built a backend using the **Spring Framework**, implementing a combination of **OAuth**, **JWT**, and **Role-Based Access Control (RBAC)** to ensure secure authentication and authorization.
- Implemented a **MySQL schema** for structured application data storage, leveraging **Flyway** for version-controlled database migrations.
- **Containerized** core components using **Docker** to enable streamlined cloud deployment.
- Developed an android app utilizing **Jetpack Compose** and **MVVM**, integrating **REST APIs** via **Retrofit**.

Student Safety App | University & [Rotary](#) Project | Ongoing

- **Designed Firebase Security Rules** to enforce **secure access control** and protect **user data**.
- **Collaborated** on creating a **Firebase Firestore backend**, enabling **real-time incident reporting**.
- **Developed an Android app** with **Jetpack Compose** and **Kotlin**, following the **MVVM architecture** pattern and communicating with a **Firebase backend**.

Open-Source Contributor | [Mihon](#)

- **Authored and refined PRs** in collaboration with maintainers, ensuring adherence to **Material Design** guidelines and project standards, and contributing to an app with over **10M+ downloads**.
- Enhanced **UI/UX** by adding features such as [swipe gestures](#) and ["Play Button"](#) for easier next-chapter navigation.

SKILLS

Backend: Spring Boot, Spring Security, JWT, OAuth, RBAC, Hibernate, MySQL, Firebase (Firestore & Security Rules), Docker, JUnit, Postman, Java, Kotlin, Microservices

Game Development: Unity, HLSL, Compute Shaders, Shader Graph, Burst Compiler, VR, Blender, C#

Frontend:

- **Android:** Jetpack Compose, MVVM, Material3, Retrofit, OkHttp, Gson, Kotlin
- **Web:** React, Redux, Vite, Styled Components, Typescript

Languages: English, Swedish (basic), Macedonian
